WELDING ELECTRODES

NIKKO YOZAI MFG., CO., LTD.

**DIVERSIFICATION OF CUSTOMER'S NEED.**

**DEVELOPMENT OF TECHNOLOGY**

**NIKKO YOZAI MFG., CO., LTD. WILL CONTINUE TO  
PROGRESS WITH OUR CUSTOMERS.**

MORE IN  
THE FUTURE.

**MESSAGE FROM PRESIDENT**

President Of  
NIKKO YOZAI MFG., CO., LTD.

  
津田 育久

With the progress of IT technology that is still going forward, advance of the technical fields such as new materials, automation and so on in welding fields is remarkable circumstances.

We are working all together on development of new products, stable supply, technological innovation and e-system in order to respond promptly to the needs for more sophisticated and diversified through below mentioned matters.

- 1. Creativity and Adventure.**
- 2. Continuous Technological Innovation.**
- 3. Response to Labor Saving Automatic Welding.**
- 4. Utilization of IT Technology.**

We will further enhance not only the standard welding electrodes, flux-cored wire, co2 wire but also stainless steel, low steel, hardfacing overlay, nickel base alloy, copper alloy, cobalt base alloy, titanium in the special material fields.

We respond quickly to any requests and consultations such as slide wire, PTA powder materials, thermal spray powder materials which are used for electron beam processing, special overlay processing and nuclear equipment.

**We will continue to make our best efforts to meet  
and exceed expectation of customers.**

Products Line of NIKKO YOZAI MFG.,CO.,LTD.

# PRODUCTS LINE THAT HAVE BEEN ACCUMULATED FOR OVER 70 YEARS.

**Coated arc welding electrodes and various materials.**

For

- Mild steel.
- High strength steel.
- Low alloy steel.
- Low temperature steel.
- Stainless steel.
- Hardfacing.
- Casting.
- Copper and copper alloy.
- Nickel and high nickel alloy.
- Cutting and gouging.

**Various materials for inert gas welding.**

For

- TIG welding rod.
- MIG wire.

**Various materials for flux cored wire.**

For

- Mild steel.
- Stainless steel.
- Hardfacing.

**Various materials for strand wire.**

For

- Mild steel.
- Stainless steel.
- Low alloy steel.
- Nickel and high nickel alloy.

**Other materials.**

- Gas welding electrodes for mild steel.
- Micro-wire for laser build-up welding.
- CO2 Solid wire.
- Insert-ring for penetration welding.
- Super Plate.
- Various powder materials for plasma powder welding.

## Company Profile

<b>Name</b>	NIKKO YOZAI MFG., CO., LTD.
<b>Brand Name</b>	NICHIA WELDING ELECTRODES
<b>Head Office</b>	1-2, 5-chome, Minami-Tsumori, Nishinariku, Osaka, Japan. Tel : 81-6-6651-9024 Fax : 81-6-6651-9795
<b>Establishment</b>	1, December, 1940
<b>Home Page</b>	<a href="https://www.nikko-yozai.co.jp">https://www.nikko-yozai.co.jp</a>
<b>Paid- in Capital</b>	¥48.00 Million Yen (Approx, US\$0.44 Million)
<b>Gross Sales</b>	¥3,000 Million Yen (Approx. US\$27.2 Million)
<b>Employees</b>	100 (As of October, 31, 2018, consolidated)

### Sales Offices and Factories

- Sales Office in Domestic.

Osaka Sales Office. (Head Office)

Tokyo Sales Office.

Nagoya Sales Office.

Hirosima Sales Office.

## Corporate History

1940	9	Tunesaku Tagi , The First President established Nikko Shokai in Osaka city for the purpose of manufacturing covered electrodes.	1993	3	Stainless steel flux cored wire started full-scale production (NFG Series) .
1942	2	Technical collaboration with Nichia Seikou. transfer production facilities to the Nichia Seikou and become exclusive cooperative factory.	1995	7	Headquqters shift from Itami city to the present location of Nikko Seisen., Co., by the hanshin earthquake.
1949	3	Ministry Commerce and Industry (Ministry of Economy, Trade Industry) sponsored nationwide welding electrodes quality competition won first prize.	1997	3	Acquisin of JIS display permission aquired coated weldingrod for high tensile strength steel. (JIS Z3212)
1950	11	Separated from Nichia Steel, established Nikko Yozai., Co.	1997	11	Sales operation at Ikoma factory.
1961	1	Technical collaboration with Fijiweld of Philipppnes.	1999	12	Started sale NZ-11.
1961	10	Start production in Itami factory. Company's name changed to Nikko Yozai MFG., CO., LTD.	2002	12	Acquired ISO 9001:2000 Cerrification.
1963	7	Hiroshima sales office established.	2003	5	Acceptance of JIS display permission for stainless steel flux cored wire. Permission item : stainless steel arc welding flux cored wire and filler rod (JIS Z3323)
1965	10	Katano new factory.	2004	7	Maintenance and enhancement for software of operation, inventory and shipping control.
1970	6	Receiving certification of export contributing company by MITI (Ministry of International Trade and Industry).	2005	6	Started operation middle-size pipe forming, improvement, small volume production of flux cored wire.
1972	4	Technical collaboration with Nikko Steel of Indonesia.	2007	1	Expansion of new factories of electron beam welding apparatus.
1972	12	Receiving Certification of AWS.	2007	7	Relocation of Oomiya sales office.
1975	4	Technical collaborration of Thailand Nichia.	2008	8	Acquisition of certification accompanying the transition to the new JIS system. Stick electrode for mild steel (JIS Z3211). Stick electrode for stainless steel (JIS Z3221). Flux cored wire for stainless steel and filler rod (JIS Z3323).
1977	3	Receiving Certification of JIS.	2008	9	Started sales LC-08.
1977	4	Hidenori Tagi inducted as 2nd President.	2009	5	Change authentication accompanying standard revision of mild steel, high tensile strength and the steel for low temperature service covered electrode (JIS Z3211).
1978	4	Established Tokyo Sales Office.	2010	4	Established department of developing sales.
1978	5	Renamed Nikko Yozai MFG., Co., LTD.	2011	2	Acquisition of JIS mark indication system certification Mild steel, high tensile strength and flux cored wire for low temperature steel. (JIS Z3313).
1980	5	Business partnership with Tokushu Denkyoku Co.,	2013	7	Relocation of Hiroshima sales office.
1981	4	Technical collaboration with Star Industrial Gas of Pakistan.	2014	4	Nagoya sales office started.
1981	12	Receiving certification of NK (Nippon Kaiji Kyokai).	2014	8	The 3rd president Ikuhisa Tsuda.
1983	12	Receiving certification of LR (Lloyd's Register).			
1984	4	Capital participation through intervention of C . Ito. Co in the management of Nikko Seisen Co.			
1984	7	Ikoma new factory.			
1989	2	Electoron beam department started.			
1990	1	New manufacturing facilities of flux cored wire at Ikoma factory, started production. Technical colloboration with Power Weld Malaysia.			
1990	3	Established Oomiya branch office.			
1992	12	Expansion of manufacturing facilities for flux cored wire, started operation.
